

Ralan Zhetenov - I made a pagination and re-raised the Docker.

Assel Tolebayeva - I studied different crm systems, how the product is sold, how customers buy products, where they come from, and the complete user behavior in the app. We coordinated the design with the team and built the structure of our Analytics. Watching the front. We are discussing our next steps with the team.

Daryn Kuralsynov

Checked on work progress. Organized meeting and discussion about project details with the team. Also we had a motivational session with my team, in order to withstand quarantine times without loss on project workflow. Studied some b2b sector politics in selling products. Ensured that each member didn't miss deadlines of any assignments. Second discussion with the team with a demo video we uploaded to assignment. More discussion about project. Initial preparations to present diploma project.
